INDEX OF ABSTRACTS

VOLUME 5

(Number refers to page on which abstract begins.)

Abel, W. R. and Blumenthal, L. M. Distance geometry of metric arcs. II, 90.

Abhyankar, Shreeram. Fundamental groups of algebraic manifolds, 189; Local fundamental groups of Kroneckerian varieties, 235.

Abian, Smbat and Brown, A. B. A note on the solution of the differential equation of the type $g(x, y, y') = 0$, 245; On the solution of an implicit equation, 572; On the solution of simultaneous first order implicit differential equations, 660; On the solution of an nth order implicit differential equation, 774; On the solution of simultaneous implicit equations, 786.

Adams, J. F. On the nonexistence of elements of Hopf invariant one mod p, 25.

Addison, J. W. Some consequences of the axiom of constructibility, 845.

Adler, A. W. and Kohn, J. J. On differentiability properties of Kahler metrics, 790.

Agmon, Shmuel. On coercive Dirichlet forms, 59.

Aissen, M. I. Existence and convergence of formal solutions of certain systems of differential equations. Preliminary report, 502.

Alavi, Yousef and Wells, C. P. Expansions of parabolic wave functions, 811.

Alling, N. L. On an extension of a classical theorem on groups, 693; On certain totally ordered non-abelian groups of rank 2, 803.

Amemiya, Ichiro and Halperin, Israel. Finiteness and continuity in complemented modular lattices, 323.

Amir-Moez, A. R. Some equalities in a unitary space leading to equalities concerning singular values of sets of matrices, 236.

Amitsur, S. A. Means of arithmetic functions, 831.

Anderson, A. G. The prediction of quantitative characteristics in polygenic systems. III, 304.

Anderson, F. W. Concerning a generalization of the Stone-Weierstrass approximation theorem. Preliminary report, 70; A class of function algebras, 379.

Anderson, F. W. and Blair, R. L. Characterizations of the algebra of all real-valued continuous functions on a completely regular space, 71; Spaces of real ideals, 378.

Anderson, L. W. and Bharucha-Reid, A. T. Topological semigroups and n-means, 67.

Anderson, R. D. A certain two-dimensional continuum, 79; The groups of all homeomorphisms of certain homogeneous spaces, 305; Minimal sets under flows on tori and derived spaces, 843.

Andrushkiw, J. W. A note on monotonely decreasing functions, 334.

Anselone, P. M. Integral equations of the Schwarzchild-Milne type, 45; Integral equations of radiative transfer, 305; Ergodic theorems for discrete semi-Markov processes. Preliminary report, 832.

Appel, K. I. Horn sentences in identity theory, 343.

Aronson, D. G. On the fundamental solution of a parabolic system of equations. Preliminary report, 495.

Artzy, Rafael. On automorphic-inverse properties in loops, 572.

Asenjo, F. G. On the formalization of the concept of internal relation, 832.

Askovitz, S. I. Some applications of centroids to problems in numerical analysis, 832.

Aurora, Silvio. Multiplicative norms for metric rings. I, 337; Multiplicative norms for metric rings. II, 338; Multiplicative norms for metric rings. III, 338; On power multiplicative norms. I, 338; On power multiplicative norms. II, 339; On certain regular metric rings, 339.

Auslander, Louis. Locally affine spaces with abelian holonomy groups, 151; A class of discrete uniform subgroups of solvable Lie groups, 348.

Austin, D. G. On the interdependence of the Kolmogorov differential equation, 220; Some results in Markov chain theory, 490; On the entrance-boundary for Markov processes with discrete state
